– Be aware of your audience

– Registration in the Xecs Project Zone

– Project Outline preparation and submission

– Summary: Project flow to submit a Project Outline

– Next Step: Full Project Proposal

– The Xecs Team

CALL PROCESS

Xecs Call 3 is designed in a **two-stage procedure** producing**: PROJECT OUTLINE (PO).**

PO positively evaluated are invited for the second stage:

Full Project Proposal (FPP).

The National Public Authorities (PA) are fully involved in the evaluation and labelling of projects. After labelling (or earlier dependent on national procedures), partners can apply for funding through their National Public Authorities.
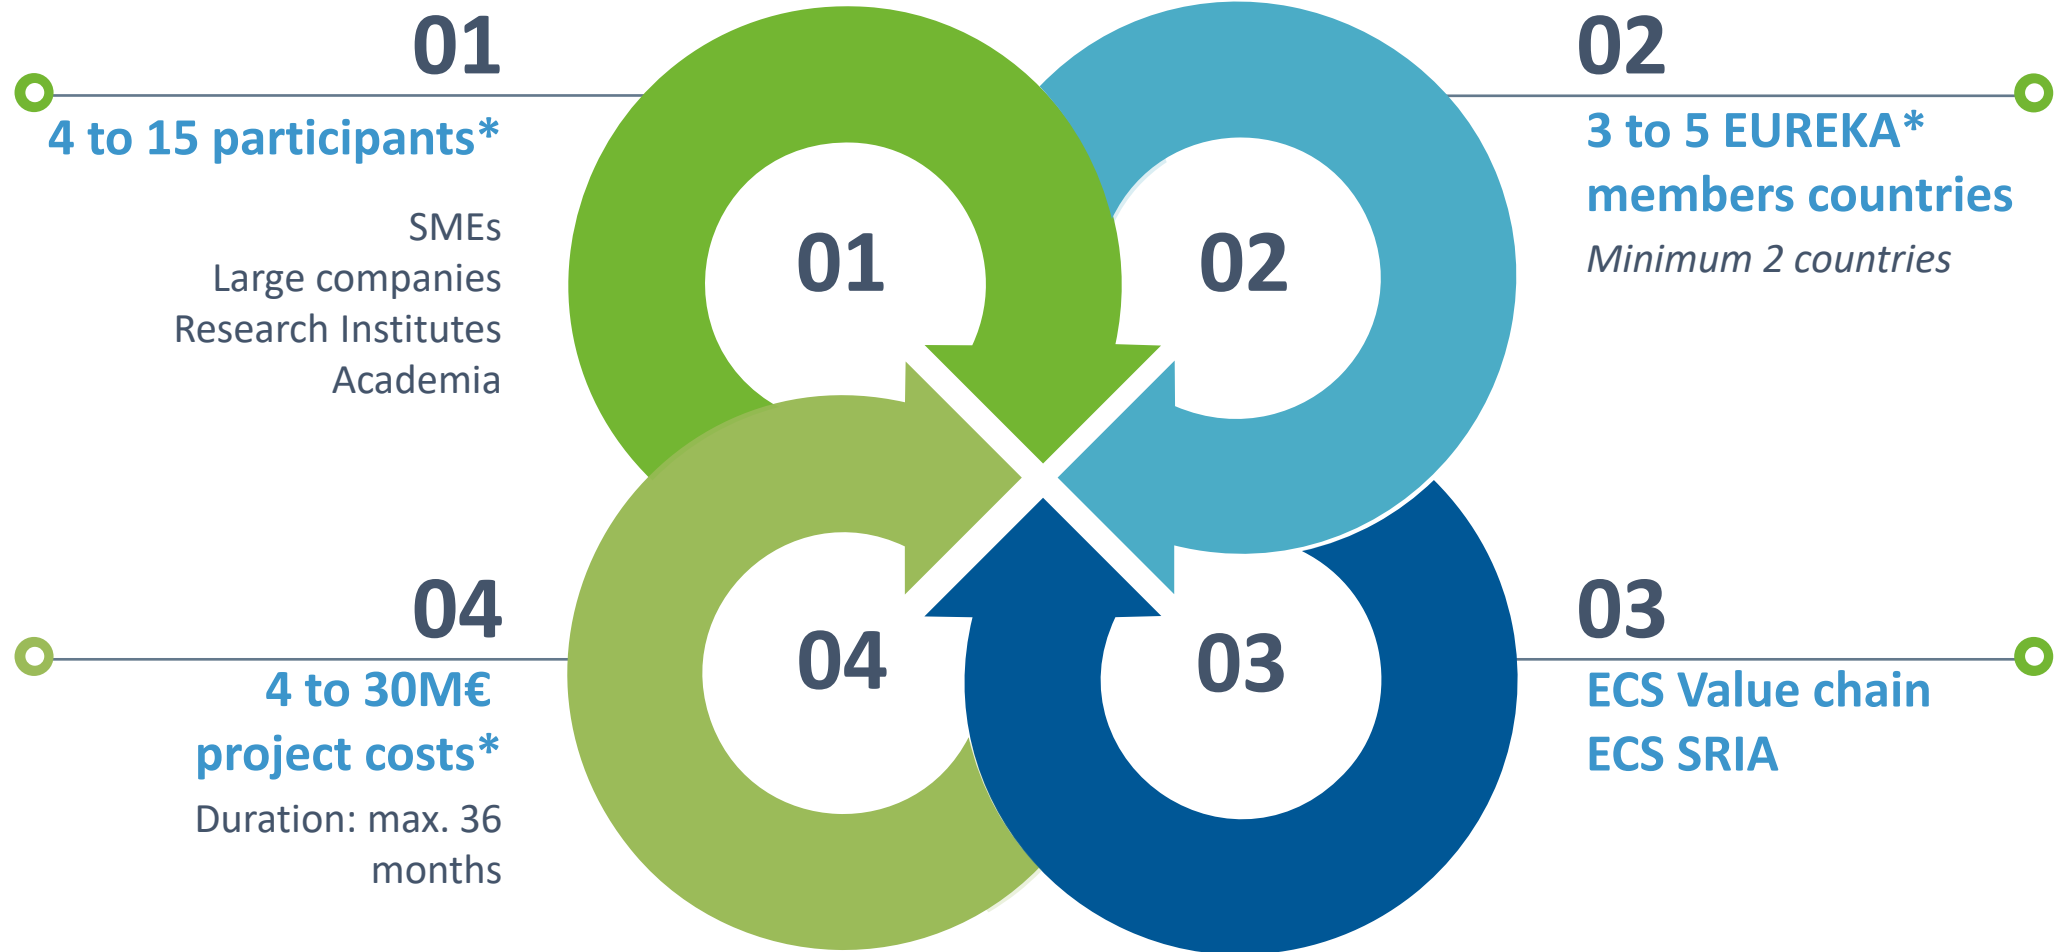

CONSORTIA & PROJECT CHARACTERISTICS

Xecs projects are industry driven, technically innovative and application oriented.

Project consortia need to cover at least an essential section of the complete electronic components and systems value chain.

Project consortia can be composed of representatives from large industry, small and medium-sized enterprises (SMEs), research institutes, universities.

XECS TYPICAL PROJECT

01

4 to 15 participants*

SMEs
Large companies
Research Institutes
Academia

02

3 to 5 EUREKA*
members countries

Minimum 2 countries

04

4 to 30M€
project costs*

Duration: max. 36
months

03

ECS Value chain
ECS SRIA

01

02

04

03

* Figures represent a range of a typical project and are not limits

5

ELIGIBILITY CRITERIA

Xecs projects consortia must have at least two different partners from two different <u>EUREKA countries</u>. **We recommend involving partners from at least three countries.**

Xecs projects must **involve at least 35 person years**.

Xecs projects must be directed at researching or developing an innovative product, process or service.

Xecs projects must have a civilian purpose.

Xecs projects should be well balanced between partners.

BE AWARE OF YOUR AUDIENCE

Technical Experts will focus on the **impact, quality and viability of the project as a whole**:

- Extending the State-of-the-Art
- Clear goals and objectives
- Complementary and appropriate consortium
- Stretch, but viable, targets reached through a well organised project
- Relevant to the Xecs programme target (ECS SRIA)

National reviews will focus on **National impact** within the context of a trans-national collaborative project:

- Fulfilling National funding body criteria
- Matching National RD&I focus areas
- Must be addressed individually and collectively by the partners in each country
- Clear in country impact in return for national support given

PO STAGE

✓ Create a convincing story
✓ Push innovation for actual market impact
✓ Explain the concept and consortium relevance
✓ Present clear objectives

The submission of a Project Outline (PO) requires 2 parallel information to be provided:

– offline preparation of the PO Annex Template (to be uploaded) and,

– online data in the Xecs Project Zone.

PO Annex Template

Xecs$^{\Sigma}$

Table of contents

2.   Project overview

2.1.   Rationale of the project

2.1.1.   Problem statement and market value chain

*(**Maximum** length: 2 pages)*

Summarise here the problem the project aims to solve. Explain the current issues, limitations or bottlenecks of what currently exists, explain the needs you plan to satisfy or to create.

Describe the societal, economic and/or technological challenges addressed by the proposed project and the market value chain that it serves

The market value chain is a representation of the various processes involved in producing products or services and delivering them to the market. It indicates where and how value is considered and created, and how the market actors in their respective markets can be profitable

This subsection describes the context and background relevant to the project, in terms of technological and market status, not the project itself. It should convince evaluators that the project partners have a good understanding of the context in which they will be evolving, both technology- and business-wise.

<Text to be inserted here>

2.1.2.   Project innovations and technology value chain

*(**Maximum** length: 1-2 pages)*

Present here a brief view of the project innovations you are introducing. Focus the description on novelty in terms of the state-of-the-art. Innovation can include both technological, process, usage and business model innovations. Explain what the project brings to the table, how it differs from existing results and previous or current projects, products and services, how partners will be able to differentiate themselves from existing market actors and become competitive (or how they can create or reimagine a market). Remain concise in this section. (cf. §2.2 and §2.3).

... and how it backs the broader goals of

... odular architecture comprising the ... , as well as their interactions.

... f the project proposal.

**Overall length constraint:
40 pages for a PO
(excluding §3,§4 and annexes)**

PO PREPARATION

PO Annex Template
Guidelines

GENERAL REMARKS

Read the **green text**, and, if you don't understand it, ask the office team.

Key point: respect the page limits! Going beyond them will be interpreted by the experts as substituting quality by quantity.

Don't forget a picture is worth a thousand words.

Check for correctness of language. Poor English and incorrect spelling make it hard for the evaluators.

PO PREPARATION

Project Zone

Programme Call   Xecs Call 3 (The deadline for PO submission is on Thursday, 18 January 2024 17:00 UTC)

Projects / Project help / Submission Process

Submission Process

Help ?

The submission process (Project Outline & Full Project Proposal) requires offline and online inputs; therefore it is highly recommended to always download the latest version of the relevant Annex template to get a comprehensive overview of the offline process & requirements. Online process & requirements are detailed hereafter.

The Project Zone User Interface uses tabs for the different steps to take in creating a PO. The process is not entirely linear and some elements can be iterated (e.g. when inviting a new partner). Furthermore, inline help and checklists guide the user throughout the entire process.

- Create project
  - View Project Zone website homepage
  - Create Project
- Edit project basics
- Create / edit consortium
  - Invite partners
  - Edit partner details
    - Edit partner details
    - Add partner associates
    - Edit costs & effort per partner
- Edit funding rationales

Xecs Call 2 ▾   Projects ▾   Project evaluation ▾   Documents & templates ▾   Calendar ▾

Projects / Project help / Submission Process / Create / Edit consortium

Create / Edit consortium

From the "Partners" tab the Project Leader can invite a new partner organisation by giving an email address and clicking the button "Invite partner":

- Invited partners will show in the 'list of pending invitations' overview at the top
- Partners that have accepted the invitation will be added to the 'list of partners' at the bottom.

Inviting a partner applies to inviting a partner organisation. An invitation should be sent to and accepted by only 1 person per organisation: the main technical contact for that partner organisation. Extra contact persons per organisation can be added by the Project Leader via the "Associates" tab (on a partner page).

It is advised to first make sure all partners and work packages are listed correctly before editing costs and effort.

Accept a project invitation

If a partner contact has received a project invitation by email, he/she can accept that invitation and join the consortium by selecting the relevant invitation in the "Project invitations" section on the Project Zone website homepage.

If the project invitation is not listed, the invitation can be retrieved by clicking the "Retrieve a project invitation" button and using the invitation code (from the email).

✏ Edit role in the project

Dear Nadja ROHRBACH,

On behalf of Sheherazade Azizi we would like to invite you to join the Xecs project 2023001 Xecs Call 2 project via the Xecs project zone.

Please use the following link to automatically login to the project zone website with your existing account:

https://projects.aeneas-office.org/d/3344e80ff585d7a

After logging in, you will be able to join the project by:

- Selecting the project invitation from the section 'Project invites' on the My overview homepage, **or**
- Retrieving the project invitation and enter the following participation code: AN1LJGIVW

After selecting the project invitation, you can choose to decline or accept it.

Kind Regards,

Xecs team

On behalf of
Sheherazade Azizi
AENEAS
azizi@aeneas-office.org

If you have any questions in relation to this email please contact the Xecs team at xecs@aeneas-office.org.

44 Rue Cambronne - 75015
Paris - France
xecs@aeneas-office.org

You can invite several partners from the same organisation.

Send the first invitation to the person of the organisation who will be the Technical Contact (TC).

There are other options per organisation:
- New TC (and replace the current)
- Financial contact required
- Associate (additional contact)

National Project coordinator

Edit rationale for public funding for France in project 2023001 Xecs Call 2 project

National coordinator   Azizi, Sheherazade ⌄

Rationale

- National gain
- RoI
- value of the national consortium
- how the national consortium is well balanced

The national rationale for funding has four components:
- national gain: you have to explain the benefits for the participating countries (e.g. support to national strategies, standardisation, open source, knowledge dissemination, wellbeing improvement, impact on national productivity, etc.), how the country benefits from collaboration with other countries and the risk level of the investment (i.e. why is a public incentive preferred for such investments)
- return on investment (RoI): you have to explain how the money invested by both Public Authorities and companies is expected to generate value, revenue, jobs and/or economic growth, etc.
- value creation of the national sub-consortium: how cross-fertilisation between the various participants is achieved;
- adequate balance between the national partners (e.g. ratio of effort as a percentage for academics, SMEs, etc.)

It is crucial that all national coordinators get in touch with their national Public Authorities (PAs) to present them the project (idea, partnership, budget, etc.), checking funding opportunities and ensuring that the national consortium is eligible, even in countries that are not part of the PPA (Xecs Public Authorities). Beware of eligibility issues at national level.
